Connectors for each agent (Claude edition)

Claude AI for Digital Marketing · Day 1 · Use Claude Code

1. Connect the tools — no code

In the Claude desktop app: Customize → Connectors → Discover. Search for each tool below, click +, and sign in with your PERSONAL account. Customize → Connectors → Yours then lists all four. Claude Code uses the same connectors: type /mcp in a Code mode session to see them.

- Google Drive, Gmail, Google Calendar (your personal Google account)
- Firecrawl — web search and clean page scraping for research (free account)

The Website Designer checks pages with the desktop app's built-in browser — nothing to install.

Plugin — Marketing (by Anthropic)

In a Code mode session, type these two lines, one at a time:

```
/plugin marketplace add anthropics/knowledge-work-plugins
/plugin install marketing@knowledge-work-plugins
```

Then start a new session; /plugin lists Marketing as installed.

It gives the team general marketing know-how — skills for content creation, campaign planning, brand voice, competitive analysis and performance analytics — and commands you can type: /draft-content, /campaign-plan, /brand-review, /competitive-brief, /performance-report, /seo-audit and /email-sequence.

Do not connect its optional connectors (HubSpot, Ahrefs, Similarweb, Klaviyo and others) — the course does not need them. Horizon's own skills (sunny-voice, fact-check, fin-compliance and the channel skills) still set the voice, the facts and the rules.

2. Who may use what

Agent	May use	Limit

Marketing Team Lead	Google Drive (read), Gmail, Google Calendar	Gmail: drafts only, except one review email to the approver
Growth Strategist	web search, Firecrawl, Google Drive (read)	cite every source
Content Creator	Google Drive (docs), Gmail	Gmail: drafts only (sending is blocked)
Creative Designer	Bash: Pillow for images, ffmpeg for video	no real or synthetic "clients"
Website Designer	Artifacts; built-in browser	publish only after approval
Growth Analyst	Google Drive and Sheets (read)	no personal data in reports

3. The tools line for each agent

An agent can use only what its `tools:` line names — a connector that is not

named is invisible to it, even when it is connected. Lab 4 Prompt A asks

Claude to put these lines into each agent file for you.

growth-strategist

tools: Read, Write, Grep, Glob, WebSearch, WebFetch, mcp__claude_ai_Firecrawl, mcp__claude_ai_Google_Drive

content-creator

tools: Read, Write, Edit, Grep, Glob, mcp__claude_ai_Google_Drive, mcp__claude_ai_Gmail

disallowedTools: mcp__claude_ai_Gmail__send_message, mcp__claude_ai_Gmail__reply, mcp__claude_ai_Gmail__forward

creative-designer

tools: Read, Write, Edit, Bash, Glob

website-designer

tools: Read, Write, Edit, Bash, Glob, mcp__Claude_Browser, mcp__claude-in-chrome

growth-analyst

tools: Read, Write, Bash, Grep, Glob, mcp__claude_ai_Google_Drive

The Lead (your main session) can use every connected tool. The approval rule

(Lab 10) stops every agent from approving or publishing.
